Laminated sheets consisting of polyolefin sheets and laminating
materials

having higher softening pts. than the polyolefin sheets are heated to a
temp. lower than the softening pts. of polyolefins and vacuum- or
pressure-moulded Polyolefin sheets used are high density polyethylene,
polypropylene, etc.; laminating materials are nylon, PVA,
ethylene-vinyl

acetate saponified copolymers, etc. The mouldings formed are used for
packing of oily foods, etc.
